Industrial applicability (IA) Yes: Claims 1-11

No: Claims

2. Citations and explanations see separate sheet

### VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted: see separate sheet

#### Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following document cited in the ISR:

D1: US-A-5 328 452.

1. Document D1 discloses a device for the transdermal administration of an active compound, comprising a current generator (38) and at least one pair of electrodes (20, 30) for application to a patient, one of which must be suitable for holding a vehicle (12) containing the active compound, wherein that said generator generates a one-way current between said electrodes which is modulated in amplitude by a modulator of a periodic nature (Fig. 2A, reference numeral 48; col. 4, I. 38-45). It should be noted that the wording of the claim does not exclude an intermittent generation of other waveforms such as 56 and 62 shown in Fig. 2A.

Accordingly, the subject-matter of claim 1 is not new (Article 33(2) PCT).

- 2. Dependent claims 2-11 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty and/or inventive step (Articles 33(2) and (3) PCT), the reasons being as follows:
- 2.1 The features of dependent claims 2 (see D1, Fig. 2B), 3 (A in Fig. 2A), 7(Fig. 2B), 8 (col. 4, I. 44) and 9 (col. 4, I. 55-56) are also known from D1.
- 2.2 The features defined in claims 4-6 are standard type of waveforms routinely applied in iontophoresis. The subject-matter of claims 10 and 11 consists in the selection of specific values of the modulator frequency and the current maximum, respectively, which cannot be regarded as inventive since they do not present any unexpected effects or properties.

#### Re Item VII

### Certain defects in the international application

- 1. The features of the claims are not provided with reference signs placed in parentheses (Rule 6.2(b) PCT).
- Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art 2. disclosed in the document D1 is not mentioned in the description, nor is this document identified therein.
- 3. The vague and imprecise statement in the description on p. 6, l. 30-31, implies that the subject-matter for which protection is sought may be different to that defined by the claims, thereby resulting in lack of clarity (Article 6 PCT) when used to interpret them (see also the PCT Guidelines, III-4.3a).
